

CPE112 Practice Project Assignment

Practice Project : Practice Submitting programs using ANGEL

This project is an introduction to the ANGEL submission program.

Practice Assignment Description

1. The last action in the project 1 handout should have created the directory **CPE112_SPR13/Project_01** in your home directory. If the **CPE112_SPR13** directory does not exist in your home directory or the sub-directory **Project_01** does not exist, execute steps 33 and 34 in the project 1 handout. Once the directory **CPE112_SPR13/Project_01** is present, proceed to step 2.
2. From the **Practice Project** page in ANGEL (click on projects tab, and then Practice Project), download the file **Practice.cpp** and save it in your **CPE112_SPR13/Project_01** directory.
3. Go to the appropriate drop box by clicking on the Project Tab, Selecting the link for the project (practice project or project 1) click on the icon for the drop box for that project. Submission procedure for the drop boxes is the following:
 - Type in the title you want to show up (i.e Practice problem)
 - Message is optional
 - Click on the **Attachment button**. A separate window pops up. Select browse and search for the file to upload. After finding and selecting(click on open) the file, **click on the Upload File button** and **then click on the Finished button**.
 - Click on Submit
 - You should receive an email to your Angel account.
4. Submit the file **Practice.cpp**, that you just downloaded, **to the practice project drop box and the Project 1 drop box**.

**This assignment is for practice in submitting a program.
It does not count towards your grade in the class.**
