

CPE 353 Qt/MySQL/SQLite Exercise

- MySQL server parameters
 - Hostname: **pavelow** (from home **pavelow.ece.uah.edu**)
 - Port: **3300**
 - Username: **cpe353student**
 - Password: **123qwerty456**
 - Database: **cpe353**
 - Tables: **tags, vehicles, owners**
- Today's exercise:
 - Write a Qt program that will post queries against the DMV tables
 - You may write the output to the console using **QDebug()**
 - Use the queries appearing on Angel that we used for the SQLite exercise
- Additional practice:
 - Repeat the exercise accessing a local SQLite DMV database file
 - For additional practice, you may also use the following tables from MySQL
vets, pets, customers, accounts

CPE 353 Qt/MySQL/SQLite Exercise

- MySQL commands
 - View available databases
